# Invention Project

Ever see or use something and wonder who invented it? How did invention get here? Is it an invention or an innovation?

Students will create a word document poster (8 ½" X 11"). There will be ten **interesting** facts listed about the invention.

Sources are very important. You must get your sources from at least 3 different media. One of those sources will be a book. All sources must be done in noodle tools and printed out and attached to the poster.

The project and sources are due by October 17th
