

Name:

Alternative Energies

We have heard of Solar Power and Wind Power, but have you heard of Wave Power, Biofuel, or Hydro Power? Below is a list of different *Alternative* or *Renewable* Energies. Pick one of these topics and create a slideshow using *Microsoft Powerpoint*.

- *Nuclear Power*
- *Solar Power*
 - *Solar Cells*
 - *Thermal Heating*
- *Wind Energy*
- *Tidal Power*
- *Hydroelectric Power*
- *Pumped Storage Reservoir*
- *Wave Power*
- *Geothermal Power*
- *Biomass/Biogas/Biofuel*

Each topic may only be used twice

Slides:

- First slide: Title/Name/Graphic
- Last Slide: Work Cited Page

**** The following slides do not need to be in this order**

- *Define* the energy that you chose
- How will this energy be used?
- Where in the World is this energy most useful?
- How does this energy work? How is this energy stored?

- Are there any future plans for your particular energy? If so, what are they?
- What positive and negative effects does this energy have?
- List at least *three* interesting facts about your Alternative Energy
- What do you think? Write a short reflection on what you think about your particular energy. Is your energy the best way to help the environment? If so, why?
- What could **you** do to change your energy use?

** There must be at least one image on each slide

** There must be a short video at some point throughout the slideshow

** Research must include at least one *book* resource

** Research must include at least one *reference (encyclopedia/dictionary)*

** Research must include at least *five different* internet sources

All will be listed on Work Cited page using proper format

Do you have all of the following information in your slide show?

Check off the topics as you complete the slides

Title Page	
Definition	
How your energy is used	
Your energy's ideal location?	
How your energy works (stored)	
Future Plans	
Positive and Negative Effects	
Interesting Facts	
Reflection	
Book, Reference, five <i>different</i> websites (cited)	
Images	
What you will do to help the environment?	
*Slide Transitions	
*Animation	
*Sound	

Be creative!

Learn something new!

Have fun!
