

Instructions for creating a video using Animoto

- 1. Sign In:** To get started you'll need to sign in with the account information provided to you by your teacher.
- 2. Choose a Style:** Styles affect the look and feel of your video. Click on any of the styles (except premium) to see a preview of what a video would look like in that style. Remember to choose a style that will not interfere with the pictures you chose for your trailer.

- 3. Add Photos, Video Clips:** Now it's time to grab the photos that you have saved from ImageQuest or your own photography. *You can also choose pictures or video from the Animoto library. (Don't forget - all images must be cited.)*

Add Photos and Videos

Your content:

- Facebook
- Lightroom
- Instagram
- Flickr
- Dropbox
- SmugMug

Free stock content:

- Photos
- Videos

4. Add music: Then choose a song from the music catalog

Enter a subtitle 50

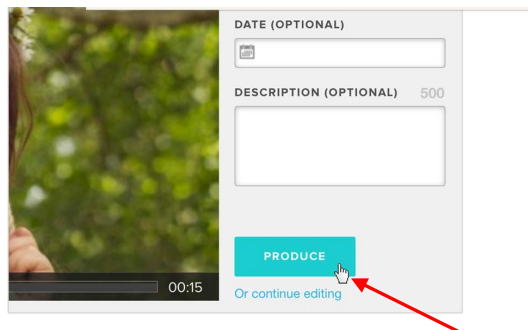

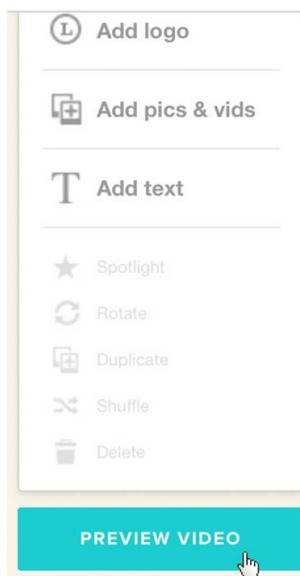

SAVE CANCEL

Save your work.

5. **Personalize:** Click into the Settings in the top-right corner to add a title.

6. **Preview & Produce:** When you're all done, click the blue Preview Video button to see what your video will look like. If you want to make changes close this window and make any edits.

When you've made it perfect, click the Produce button.

Then click the finish button after you have checked the title, etc.
