10. You can choose a type of graphic to add by clicking one of these arrows, and then dragging and dropping the graphic where you want it.

Great Hollow Library Media Center
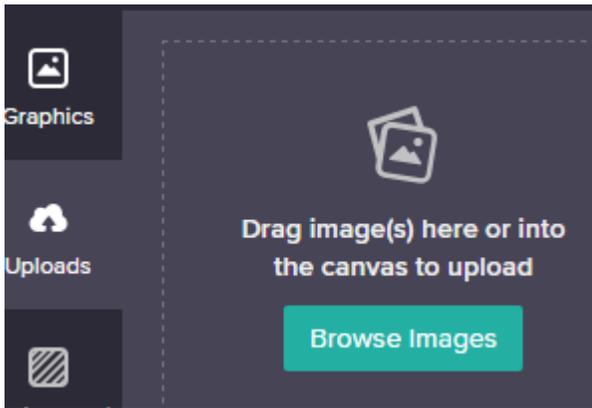

11. Another way to add graphics is to find them online. Use *ImageQuest* from the library Databases page. Then you will need to select the graphic, **download** and save the picture to your download folder (if on a Chromebook) or desktop or H drive (if on a desktop computer). In Piktochart, click **Uploads** and **Browse Images,** then choose the image you want to insert. (You can't just copy and paste it in.)

12. Although Piktochart automatically saves, it's a good idea to check the **Saved** status before signing out.

13. When *completely* finished (you have checked for accuracy, and had a peer or teacher check) click **Share.**
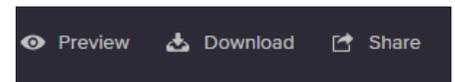

14. Be sure your infographic has a name (in the format required by your teacher). Click **Link Preview** to view the finished Piktochart. If satisfied, click **OK.**

15. Toggle the button to make the link **Public.**
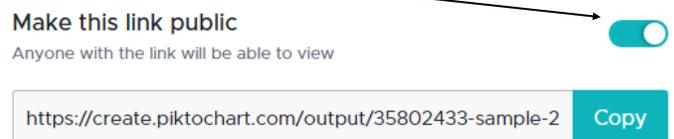

16. Copy the URL (web address) so that it can be pasted into a QR Code creator, Google Classroom, or embedded elsewhere.
